published International Application, the name appears as “Janez Kerk”, however, this is incorrect. The declaration as submitted in the United States correctly spells this inventor’s name as “Janez Kerc.” The origin or cause of this error is not known at this time, but it is believed to have arisen as a typographical error through inadvertence. Despite the typographical error, the inventors named in the International Application and in the present application should be identical. Please correct the spelling of inventor/ Applicant Kerc’s name to “Janez Kerc” on all papers and records pertaining to this case.²

The above is believed to constitute a full and complete response to the USPTO’s official Notification of Missing Requirements Under 35 U.S.C. §371 in the United States Designated/Elected Office (DO/EO/US) issued on July 14, 2009. No further filing or other Government fees are believed to be currently due in connection with any part of this paper, any request made herein, or in regard to any other matter pertaining to this application. However, if any Government filing fees and other fees are required in connection with this response or paper or in any other respect or to complete this application and to commence examination of the same on the merits, please charge the same to our Deposit Account No. 12-2355.

Respectfully submitted,
